

Zluri Training Plan

The below plan is an overview of the training that the Zluri team can provide. This can be customizable to customer's needs.

Module 1: Zluri Overview

Objective: Introduce Zluri's core capabilities, positioning, and vision. **Topics:**

- Zluri Overview – Introduction, vision, and target audience.
- Product Capabilities & Use Cases – Key existing features (Integrations, Automation, Access Reviews, etc.) and upcoming roadmap items.
- Understanding Customer Outcomes – The “current state” vs. “future state” achievable with Zluri.

Activities:

- Walkthrough of product demo video.
- Discussion on real-world use cases and customer success stories.
- Q&A session

Module 2: Platform Setup

Objective: Learn how to configure and operationalize a Zluri tenant from scratch. **Topics:**

- Tenant registration process and prerequisites.
- Integration Catalog – App scopes, capabilities, connecting methods, and troubleshooting.
- Connecting SSO and HRMS tools (Okta, Azure AD, Workday, BambooHR, etc.).
- Connecting critical apps – Slack, Google Workspace, Salesforce, etc. • Directory Management & User Classification.
- Handling User and Application Status.
- Configuring Alerts & Notifications.
- Custom Fields in Zluri.
- Bulk Uploading Data.

Activities:

- Hands-on tenant setup exercise.
- Integration setup labs for SSO and HRMS.
- Simulated directory sync and user classification workshop.

Module 3: Access Discovery

Objective: Understand how Zluri discovers, categorizes, and manages SaaS

access. **Topics:**

- Discovery Engine Overview – Why access discovery matters.
- Applications Dashboard – Connected Apps overview.
- Managing AI Applications.
- Application Categorization and Scheduling Rules.
- Setting up Alerts and Mitigating Access Risks.
- Merging similar applications.

Activities:

- Discovery lab: simulate app discovery and merging.
- Scenario exercise on identifying access risk and mitigation.

Module 4: Access Management (Joiners, Movers, Leavers)

Objective: Learn to automate employee lifecycle management with Zluri

Topics:

1. **Module Overview & Process Mapping** – Understand customer access management architecture.
2. **Foundation Setup** – Source of Truth, Directory Configuration.
3. **Components Deep Dive:**
 - Workflows, Conditions, Manual Tasks.
 - Playbooks and Custom Actions (HTTP Requests, Variables).
 - Automation Rules, Scheduled Runs, Logs, Task Dashboard.
4. **Use Cases:**
 - Joiner Playbooks: manual and HRMS/SSO-sourced users.
 - Mover Workflows: role, department, and location changes.
 - Leaver Playbooks: automation via HRMS/SSO triggers.
 - Advanced configurations.

Activities:

- Build sample onboarding and offboarding playbooks.
- Create automation rules and simulate scheduled runs.
- Test different JML flows using sandbox users.

Module 5: Access Requests

Objective: Explore employee-driven access request workflows and automation. **Topics:**

- Access Requests Problem Overview.
- Mapping current process vs. Zluri architecture
- Employee Experience: Slack, App Catalog, Dashboard.
- Admin Control Center:
 - Slack Integration & Scopes.
 - Catalog Settings, Custom Form Creation.
 - Playbook Building & Global Rules.
 - Run Logs, Notifications, Reminders.
- Access Request via ITSM.
- Advanced Configurations.

Activities:

- Configure Slack-based access request demo.
- Create a custom access request form.
- Build a playbook triggered by request approval.

Module 6: Access Reviews

Objective: Conduct access certification cycles for compliance and governance. **Topics:**

- Overview and need for Access Reviews.
- Pre-requisites: Data fetching (Integrations, SSO, CSV, SDK).
- Reviewer Experience walkthrough.
- Admin Control Centre:
 - Architecting Access Reviews.
 - App & Global Playbooks.
 - Closing the Loop – Owner Actions, Tracking, Reporting.
 - Multi-level Reviews setup.

Activities:

- Run a mock access review cycle.
- Review results and simulate remediation.

Module 7: Other Topics

Objective: Expand technical and operational mastery of Zluri.

Topics:

- Zluri APIs and SDK.
- Common Troubleshooting Issues.
- Implementation Best Practices.
- Zluri Support Model:
 - How to raise a case, support portal access, help docs navigation.

Activities:

- API call simulation (GET/POST examples).
- Troubleshooting lab with common errors.
- Review of support workflows and escalation matrix.

Certification

- Multiple Choice Question test
- Lab Assignment

A minimum score is expected from the participant to get assigned to a Zluri Certificate.
