

Statement of Work

Identity Governance and Administration & SaaS Management

By Zluri, Inc

For Lesaffre

1. Introduction

This Scope of Work document will include-

- Overall project purpose & objective
- Project scope & deliverables
- Roles & responsibilities
- Technical requirements & Assumptions
- Testing and quality assurance, support
- Signatures & Sign-off

2. Purpose and objectives

Zluri will deliver comprehensive Identity Governance and Administration and or SaaS Management services for Lesaffre. The primary objective of this agreement is to empower Lesaffre to understand how Zluri as a platform works and how it can add value in their day to day operations.

Project Objectives:

SaaS Management Objectives:

- **Access Discovery:** Identify and monitor all SaaS applications, including unauthorized or unmanaged tools, which users have access to which applications.
- **License Optimization:** Optimize licenses by identifying un-deprovisioned, unused, and unassigned licenses and ensuring efficient reallocation
- **Vendor & Contract Management:** Centralize and streamline the management of vendors and contracts

3. Scope and Deliverables

Scope:

- Zluri to enable Lesaffre on how to use the overall Zluri Platform and what are its features.
- Help Lesaffre to build a project plan for achieving milestones at regular intervals for continuous value.
- Helping Lesaffre during the initial set up of Zluri and making them comfortable on the usage of the platform.
- Initial set up for SaaS Management will include
 - Help Lesaffre to onboard them to Zluri platform
 - Initiate 10 applications integration to help move towards first milestones and understand Access Discovery
 - Enable and help upload contracts for 10 applications to the Zluri platform
 - Help and enable to build workflows for 10 applications for Optimization

Deliverables:

SaaS Management

- Access Discovery - Help in integrating 10 applications (ideally IDP, HRMS, and collab tools to start with) and provide visibility of other SaaS applications connected with the IDP and what level of access does different roles of employees have.
 - Also, highlight accounts that are unused, ex employee accounts who still have access to these applications.
 - Also, highlight applications (if applicable) that are being used via SSO mechanism but not approved by the organization.
- License Optimization: Enable Lesaffre to understand how license optimization works and help them in generating optimization workflows if required.
 - Basis unused licenses
 - Basis undevisioned licenses
- Vendor and Contract Management: Help Lesaffre to upload and manage contracts on the Zluri platform
 - Manage vendors and annual budgets on the Zluri platform
 - Manage renewal reminders for contract renewals on the Zluri platform

4. Technical Requirement and Assumptions

Zluri will need Lesaffre admin/ owners of various applications to help onboard different application integrations onto the Zluri Platform.

Instance Setup (To be added during Onboarding phase)

Task	Details
Company Name	
HR System [Source of Truth]

List of Domains	
Reporting Manager	
Cost Centre	
Org Unit	
Custom Fields	
Default Currency	

Note: During the implementation, there will be integrations that might not provide all the information or some integrations might not be available. For this, we might have to use alternative

Implementation Timeline

Custom implementation and onboarding timeline and project tracker will be created and shared in accordance with the objectives of Lesaffre.

Assumptions

- Lesaffre teams will provide timely support to review and carry out assigned activities as they will be discussed during the onboarding discussion basis Lesaffre's outcomes
- Zluri's platform will provide all the available insights on the platform and if there are any that will be required, will need to be discussed and agreed upon.
- No custom effort has been included apart from whatever is agreed in the MSA if any.
- No firm commitments for any new integrations/ changes to the integrations will be done during the time of implementation
- All product feature requests and new/upgrading integrations will be routed to the product team for evaluation purposes to be considered to be added to the product roadmap and Zluri will keep Lesaffre informed on the release.

5. Roles & Responsibilities

Zluri Team

- Responsible for driving the entire project to deliver value during the initial onboarding and delivery phase.
- Assisting the Lesaffre team with any technical issues that may come up during the course of Implementation.
- Helping in architecting solutions basis Lesaffre's landscape and scenarios.
- Suggest best practices for managing the SaaS Management and Identity Governance and Administration
- Preparing and sharing all the collaterals or the training materials that are required
- Admin and platform training for the users who would be using Zluri as and when required during the implementation phase.
- For Lesaffre's initial go-live implementation, the Zluri Customer Success team will be onsite to ensure a seamless transition and provide dedicated support to promptly address any issues.

Lesaffre Team

- Bringing in the right stakeholders from various functions like IT for the

outlined tasks

- Availability of Lesaffre team for Discovery sessions and during training session
- Integrating with the applications as per the plan (Application owners with admin access to connect integrations)
- Internal clearances to connect applications to Zluri and share data (this is usually one time prior to onboarding)
- Data validation on Zluri and UAT for any custom configurations done for Lesaffre
- Take over of implementation post initial onboarding and go- live with the initial set of applications.

6. Testing and Quality Assurance, Support

Testing and Quality Assurance

- Basis Lesaffre objectives and milestones, Zluri team will be asking the customer team to test various use cases before go live to get UAT approvals
- The Zluri team will be available to discuss and come up with different solutions based on the customer requirements and make sure the Lesaffre team has all the necessary help required.

Support

A dedicated **Customer Success Manager (CSM) and Customer Solutions Engineer (CSE)** will be assigned to Lesaffre to guide you through the onboarding and pilot journey with Zluri, ensuring a seamless experience. During this phase, regular check-ins (weekly or bi-weekly) will be conducted with the CSM and CSE to drive product adoption and help achieve your business objectives and ROI targets.

Post go-live, the CSE will continue to be available for technical queries and solutioning support as required. For any additional implementation needs beyond go-live, our team will work with you to scope and deliver them through **Managed Services**.

In addition, we will establish regular cadences with the **Zluri Product team** to share updates on the product roadmap and engage in strategic discussions.

Zluri's Customer Support team is also available 24x5 (weekdays) to assist with quick queries and issue resolution. You can reach them directly at support@zluri.com
